Senior Web Application Developer
Washington, District of Columbia, United States · Software Development

DESCRIPTION

About Aristotle

Aristotle is the leading political technology and data company in the world with associates in Atlanta, San Diego, Salt Lake City, Washington, Toronto and London. Our team of experts comes from all facets of tech, political and corporate backgrounds to offer the most powerful tools to campaigns, elected officials, voters, government organizations, corporations, nonprofits and PACs all over the world, no matter their democratic ideology.

Aristotle also operates PredictIt.org, the only real-money political prediction market in the U.S. This research project was established to provide valuable data to universities, think tanks and political scientists who study the wisdom of the crowds and political forecasting.

All positions are fulltime, with competitive compensation, medical benefits, paid vacation, 401k plan and stock options. Casual dress code and a non-corporate atmosphere make this a fun place to work and learn in a team environment. Please visit our website at aristotle.com.
