CACI employs a diverse range of talent to create an environment that fuels innovation and fosters continuous improvement and success. Join CACI, where you will have the opportunity to make an immediate impact by providing information solutions and services in support of national security missions and government transformation for Intelligence, Defense, and Federal Civilian customers. A Fortune Magazine World’s Most Admired Company in the IT Services industry, CACI is a member of the Fortune 1000 Largest Companies, the Russell 2000 Index, and the S&P SmallCap600 Index. CACI provides dynamic careers for over 20,000 employees worldwide.

Computer Engineering Internship

**DESCRIPTION**

Provide systems engineering expertise in support of development and day-to-day execution of system Operations and Maintenance (O&M) activities. Develop and execute system integration, factory, and acceptance test plans and procedures.

**REQUIRED**

- Bachelor’s Degree in Progress (Preferred Majors)
  - Information Systems
  - Computer Engineering
  - Electrical Engineering
  - Computer Science
- U.S. Citizen
- Ability to Obtain a Security Clearance, Background Investigation and Polygraph
- No Drug Use

**PREFERRED**

- Broad domain IT knowledge, including: operating systems; server and infrastructure security, backup and restore processes, monitoring and management tools; server and network architecture and protocols; large data warehouse systems
- Unix/Linux operating system experience
- Experience with SQL and DBMS concepts
- Experience leading engineering discussions (e.g., technical exchange meetings, design reviews)
- O&M Configuration Management experience

**EQUAL OPPORTUNITY EMPLOYER**

CACI International Inc. is an Equal Opportunity Employer - Females/Minorities/Protected Veterans/Individuals with Disabilities.

**APPLY BY EMAIL**

CACI Career Opportunities

Intelligence Analyst

Title: Intelligence Analyst
Location: Charlottesville, VA
Clearance: Ability to Acquire and Maintain active/current TS/SCI
Years of Exp: 0-2 Years of experience
Education: See required section

REQUIRED
- Requires a BA degree with an Engineering or Regional Area Studies major and 0-2 years of experience.
- Must have good written and verbal communication skills and experience briefing senior personnel.
- Must be able to research, analyze and provide professional Intelligence assessments that support tactical, operational or strategic goals of customers
- U.S. Citizen
- A clearance would need to be granted prior to starting on this program
No Drug Use

PREFERRED
- Native or near-native foreign language skills is highly desired.
- Military experience.
- Experience in critical evaluation of networks or structures to identify potential vulnerabilities for exploitation.
- Good interpersonal skills. Analysts will be expected to maintain a level of customer outreach and continuous collaboration.
- Technologically proficient. Should be able to quickly understand how to use and employ database and analytical tools from across the Intelligence Community. Should also have the ability to work closely with technologists to develop new tools specific to analyst requirements in order to streamline efficiency.
- Knowledgeable in all intelligence disciplines capabilities, limitations and platforms to include HUMINT, SIGINT, IMINT, and OSINT.
- Ability to provide innovation and critical thinking skills to all customer problem sets. Expected to expertly translate creative and critical thinking into written and oral forms.

EQUAL OPPORTUNITY EMPLOYER

CACI International Inc. is an Equal Opportunity Employer - Females/Minorities/Protected Veterans/Individuals with Disabilities.

DESCRIPTION

Provides structure and infrastructure-centric all-source analysis in support of customer requests for information in order to identify and exploit vulnerabilities and collection opportunities for future or on-going operations. This position is in support of the Facilities and Infrastructure Characterization and Analysis (FICA) Branch at the National Ground Intelligence Center (NGIC). Candidate will work on a multi-intelligence fused team consisting of other all-source analysts, Imagery Intelligence (IMINT), and Signals Intelligence (SIGINT) analysts, Geospatial Intelligence Specialists (GIS), Culture and Language analysts, with Technologists and Collection Management support.

CACI Career Opportunities

Jr. Cyber Capabilities Developer

**DESCRIPTION**

In CACI’s Cyber Capabilities and Development Division (C2D2), there isn’t a day that goes by where you won’t be challenged and have the opportunity to grow in an environment of innovation and fun! Although CACI is a mid- to large-sized company, C2D2 operates like an independent small agile business, developing and executing on both long-term projects, as well as, Quick Reaction Capability development, rapid acquisition, and short-term deliverables. We approach our Customers as mission partners and focus on mission-oriented capabilities that deliver tip-of-the-spear force multiplying effects. In short, we believe in our mission, our team, and our solutions!

**DUTIES AND RESPONSIBILITIES:**

- Develop highly technical hardware and software cyber solutions that interact with industrial, military, communications, aerospace, and other applications, applying principles and techniques of computer science, engineering, and mathematical analysis.
- Interpret and transition vulnerability research and reverse engineering reports into technical requirements and cyber tools and/or products that exploit system weaknesses.
- Conduct source code reviews of custom developed solutions, to include static and runtime analysis to identify security vulnerabilities and performance bottlenecks.
- Develop and/or support development of system documentation (requirements analysis, testing procedures, configuration management, user guides, etc.).

**PREFERRED**

- DevOps experience including software development using Agile methodologies (scrum, kanban) Security Certifications (Security+, Network+, CEH, CISSP, OSCP) Exploit development
- Fuzzing experience or CTF experience
- Operating System (OS)-agnostic (Linux, Windows, iOS, Android, various RTOSs), including knowledge of operating systems internals

**REQUIRED**

- One or more of the following Programming Language and Scripting Knowledge (Python, Ruby, C++)
- Understanding of wired and non-wired networking protocols
- Clearable to TS/SCI
- Good Communication Skills (verbal and written) - able to understand and communicate technical concepts in non-technical terms
- Ability to communicate technical progress and risks on fast-paced projects and in a results-oriented environment
- Candidate can start on program while clearance is in process
- U.S Citizen

**EQUAL OPPORTUNITY EMPLOYER**

CACI International Inc. is an Equal Opportunity Employer - Females/Minorities/Protected Veterans/Individuals with Disabilities.

Junior Systems Engineer

Title: Junior Systems Engineer
Location: Sterling, VA
Clearance: Ability to Obtain and Maintain
Yrs of experience: 0 – 2 years
Education: Bachelor’s degree or equivalent
JR#: 129646

The commitment of our BITS employees to "Engineering Results" is the catalyst that has propelled BITS to becoming a leader in software development, R&D, sensor development and signal processing. Our engineering teams are highly adept at solving complex problems with the application of leading-edge technology solutions, empowering decision-makers to make better mission-critical decisions. We have operational personnel stationed around the world in support of our customers’ missions.

REQUIRED:
- Understanding and implementation of System Engineering processes
- Exposure to all phases of product development (concept, design, implementation, test, and production)
- Working familiarity with Microsoft Word, PowerPoint, Excel, Project and Visio
- U.S Citizen
- Ability to Obtain a Security Clearance, Background Investigation and Polygraph
- No Drug Use

DESCRIPTION:
We are looking for a Systems Engineer to work in our Sterling, VA office. The position requires a background in Systems Engineering. The candidate will be assisting in the creation of requirements, architectures, CONOPs, test plans and procedures for a variety of platforms and missions.

RESPONSIBILITIES:
- Develop and track requirements for multiple projects
- Develop operational CONOPs and document the results
- Prepare and execute test plans and procedures
- Work with the development team to perform system testing throughout the lifecycle of the project
- Participate in customer demonstrations of prototype hardware
- Develop design review documentation
- Prepare monthly status reports for the customers
- Lead Squad-X Systems Engineering coordination efforts with the various subcontractors

PREFERRED:
- Experience with Linux
- Programming skills in C, C++, and Python
- Familiarity with radio frequency (RF) systems and test equipment (spectrum analyzer, network analyzer, signal generator, etc)
- Basic understanding of software defined radio systems

</table>

**DESCRIPTION**

Come join CACI’s exciting and cutting-edge Cyber Capabilities and Development Division as we push the envelope to enable our nation’s cyberspace operations! As a Junior Vulnerability Researcher, you will analyze systems to understand how they work, where they have weaknesses, and how they behave when they break. This analysis crosses the disciplines of hardware, software and firmware.

**REQUIRED**

- Candidate can start on program while clearance is in process
- U.S. Citizen
- 2 or more of the “desired skills”

**Desired Qualifications:**

- Understanding of OS Internals (binaries associated with any major OS)
- Experience reading or writing assembly (x86, x64, ARM, PPC, MIPS, SPARC, 68k, or others)
- Experience developing embedded systems and tools
- Understanding of network protocols (TCP/IP stacks, wire-level protocols, RF communications, BGP, routing protocols, or others)
- Understanding of exploit mitigations such as DEP and ASLR
- Experience using reverse engineering tools such as IDA Pro, HexRays, or objdump
- Experience using debuggers such as gdb, WinDbg, OllyDbg
- Conducted penetration testing (able to use tools such as Metasploit)
- Experience with fuzzing tools (e.g. AFL, Peach) and interpreting crash reports that result from fuzzing
- Experience with C/C++, Python, Java, Ruby (minimum one scripting and one programming language)
- Have participated in multiple CTF events

**Duties and Responsibilities:**

- Reverse engineer Customer Furnished Equipment, Commercial-Off-The-Shelf (COTS) equipment, and other equipment to understand how the system hardware, software and firmware operate together.
- Analyze the system and identify exploitable vulnerabilities.
- Develop vulnerability research and reverse engineering reports with sufficient depth and detail such that cyber capability developers can translate the reports into technical requirements for cyber tools and/or products that exploit system weaknesses.
- Conduct detailed source code reviews of custom developed solutions, to include static and runtime analysis to identify security vulnerabilities and performance bottlenecks.
- Contribute to the development of highly technical hardware and software cyber solutions that interact with industrial, military, communications, aerospace, and other applications, applying principles and techniques of computer science, engineering, and mathematical analysis.
- Develop and/or support development of system documentation (requirement analysis, testing procedures, configuration management, user guides, etc.).

**REQUIRED:**
- Currently enrolled in a bachelor’s or master’s degree in a technical field, such as Networking, Computer Science, Electrical/Computer Engineering, Information Technology or a similar field
- Fluent in English (verbal and written)
- Passionate about networking, information technology or computer science
- Knowledge of adjacent technologies, holding Certifications (e.g., CCNA, CCNP) or industry recognized certifications is a plus
- Strong analytical and problem solving skills with ability to troubleshoot technical problems
- Ability to multi-task, self-start, work in a fast-paced team environment and work independently
- Willing to take on new challenges and develop new skills.
- No criminal background. Must fill out SF-86 for Top Security Clarence and must be able to pass CI polygraph
- Must be living in or be willing to move to DC/Maryland/Virginia and United States Citizen at the time of application.
- Ability to Obtain a Security Clearance, Background Investigation and Polygraph
- No Drug Use

**DESCRIPTION:**

We are looking for a Network Engineer to work in Chantilly, VA office. The position requires a background in Network Computer Science, Electrical/Computer Engineering, Information Technology, or similar field. The candidate will be assisting in building networks, monitoring and tracking network requests, supporting network infrastructure and how to deliver business solutions.

**REFERRED:**
- Hands-on experience with next-generation technology
- Create services that help customers manage their networks while providing strategic and tactical support
- Build networks consisting of a variety of Cisco and Juniper equipment every day
- Monitor and track network recreate requests
- Support the network infrastructure
- Collaborate with experts
- Receive in-depth training and build your skills as you earn industry-leading certifications (expected to receive CCNA by the end of the intern term).

CACI Career Opportunities

Systems Engineer

Title: Systems Engineer
Location: Charlottesville, VA
Clearance: Ability to Acquire and Maintain active/current TS/SCI
Years of Exp: 0-2 Years of experience
Education: See required section

DESCRIPTION

This position is in support of the Facilities and Infrastructure Characterization and Analysis (FICA) Branch at the National Ground Intelligence Center (NGIC). Candidate will work on a multi-intelligence fusion team consisting of all-source, Imagery Intelligence (IMINT), Signals Intelligence (SIGINT), and Culture and Language analysts. Supports analytical teams with deskside development support, with particular emphasis on custom tools, scripts, and quick-turnaround technical solutions. Advises analytical teams in workflow development, employing a broad spectrum of both GOTS and COTS resources. Provides expertise in a wide variety of technologies, to include scripting languages, relational databases, and Linux distributions. Contributes to web mapping application projects through the interpretation of business logic, data modeling, API development, and User Interface design. Creates and deploys tools customized to analysts’ specifications to improve efficiency. Remains current in emerging technologies as they apply to changing mission requirements through proactive training, collaboration, and professional development.

REQUIRED

- Requires a BA degree in Computer Science or related field and 0-2 years of experience.
- Experience with agile development methodologies and practices – desk side development, Serum, user stories, backlogs, continuous integration, retrospectives, etc.
- Experience with Java (JSON, Elasticsearch, Django).
- Experience with HTML, Python, Hadoop, Spark, Julia, Scala, API development and JavaScript
- Must be security+ certified.

PREFERRED

- Military experience. Prior Service, GI Bill, or ROTC.
- Good written and verbal communication skills and experience briefing senior personnel.
- Knowledgeable in all intelligence disciplines capabilities, limitations and platforms to include HUMINT, SIGINT, IMINT, and OSINT.
- Ability to provide innovation and critical thinking skills to all customer problem sets. Expected to expertly translate creative and critical thinking into written and oral forms.
