POSITION TITLE: Business Intelligence Developer
REPORTS TO: BI Practice Director
SEND RESUME TO: Katherine Duncan at kduncan@cptech.com

Position Summary:
Founded in 1994, Corporate Technologies, Inc. is a systems integrator headquartered in Burlington, MA, and a leading partner of F5, HP, IBM, Juniper, Microsoft, NetApp, Oracle, Informatica and SAP/Business Objects. Corporate Technologies brings companies the experience and expertise required to architect, implement and manage strategic enterprise infrastructure and strategic applications. Corporate Technologies serves clients in the financial services, pharmaceutical, biotechnology, wholesale/distribution, publishing and manufacturing industries.

We are seeking a talented fast learning problem solver with strong interpersonal skills. A successful candidate will have strong technical and communication skills with the ability to learn and adapt quickly to changing environments. Although this is not a full time coding role, a successful candidate must be capable of coding, with solid problem-solving skills and also have the ability to communicate, enthusiastically, clearly and concisely to other consultants and clients. A desired candidate will be driven to have impacts on client businesses and create differentiation in the market.

Essential Duties and Responsibilities include the following:
- Learn and develop in Data Warehouse and Business Intelligence development tools and frameworks that cover topics such as:
  - Extract Transform, and Load (ETL) using enterprise class tools such as Informatica and Oracle Data Integrator
  - Data modelling in 3NF and Dimensional Modelling
  - Business Intelligence applications such as Oracle Business Intelligence Enterprise, Tableau, Qlik, and Endeca
  - Engineered system implementations such as Oracle Exalytics
  - Database development and tuning in Oracle and SQL Server
  - Information Discovery using Endeca with entity extraction and text analytics
  - Big Data development
- Develop prototypes and proof of concepts to demonstrate to clients
- Write blogs and create webinars based on the projects and prototypes
- Willing to travel up to 50%

Essential Education, Skills, and Environment:
- B.S. degree or higher in computer science, engineering or related discipline, or equivalent combination of education and experience. GPA 3.5+
- Completed database and statistics course work
- Experience in a programming languages such as: in Java, JSP, Python, .NET, R
- Excellent communication and interpersonal skills and fluency in English
- Skilled in SQL
- Good knowledge of Unix or Linux
- Good knowledge of XML/XSLT, HTML/CSS.
- Good knowledge of repositories, such as SVN or GitHub
Benefits
We offer a competitive salary and benefits, including 401(k), medical, dental, short term and long term disability, paid time off, and life insurance.

Corporate Technologies is an Equal Opportunity Employer. We welcome and encourage diversity in the workplace.

Our graduate package includes a sign-on bonus and technology training.
