CapitalPro
Silicon Valley, CA

CTO

CapitalPro provides digital solutions for financial advisors.

Our technology empowers financial advisors to expand their client reach by tearing down the time and cost constraints that limits their growth.

Our software automates the process of estimating risk profiles and creating personalized and globally-diversified portfolios. Our mission is to enhance the advisor-investor relationship making it easier to onboard and manage smaller investor accounts.

We are a Fintech startup with offices in Silicon Valley and undergoing Plug and Play's Accelerator Program (www.plugandplaytechcenter.com).

We are looking for a CTO to join our team as a Co-Founder and help us build the back-end of our software.

The CTO will be responsible for:
- Build database for the application.
- Proficient with MySQL or PostgreSQL.
- Develop web framework using Python.
- Maintain quality and ensure responsiveness of applications.
- Collaborate with the rest of the engineering team to design and launch new features.
- Maintain code integrity and organization.
- Understanding and implementation of security and data protection.
- Experienced with back-end programming languages.
- Development experience for desktop.
- Experience with cloud message APIs and usage of push notifications.

Compensation:
The CTO will join the team as a Co-Founder with a 15% to 20% stake in the company. He will also have the opportunity to go through Plug and Play's 10 week Fintech accelerator program.

Qualifications:
BS/MS degree in Computer Science, Engineering or a related subject.
Working experience with Python.
(Experience with third-party libraries and APIs is a plus.)
(Experience with Android and iOS platforms is a plus.)

Start Date: July 26th, 2017
