Founded in 1900, the College Board was created to expand access to higher education. Today, we are a mission-driven, not-for-profit membership organization made up of over 6,000 of the world’s leading colleges, schools, and other educational organizations. Through our programs and initiatives we challenge all students to own their future by practicing hard and taking advantage of every opportunity they earn.

Each year, the College Board helps more than seven million students prepare for a successful transition to college through programs and services in college readiness and college success — including the SAT® and the Advanced Placement Program®. The organization also serves the education community through research and advocacy on behalf of students, educators and schools.

The College Board’s Internship Program is an exciting chance to develop new skills while contributing to an organization that is committed to the transformation of education in America through college readiness for all students.

This is a 10 week paid internship in our Reston, Virginia Office.

As a member of the Information Security Team

You be a part of the College Board’s Information Security team working to identify, correlate, assess, and react to real-time security events, vulnerabilities, and network traffic changes. You will assist with identification of and analysis of threats to the environment and will be an active member of the Incident Response team. As part of this team and over the 10 week Internship, you will learn about different security frameworks, how risk is mitigated in an enterprise technology organization leveraging cutting edge cloud technologies and how to think proactively in threat assessment and vulnerability identification.

Technical Skill Requirements:
- Risk Management experience or frameworks (PCI DSS, ISO 27001) understanding
- Background in Information Security practices and methodologies

Additional Requirements:
- Must be a current Junior or rising Senior enrolled in a full-time Bachelor’s or Graduate degree program in a related field such as information systems, information security, computer science or engineering
- Ability to work independently
- Strong critical thinking, problem solving, and analytical skills
- Strong written communication skills
- Effective time management skills
- Desire to learn, explore and be challenged
- Interest in working for a mission-oriented, not-for-profit organization dedicated to improving education
- Committed to working the entire agreed upon internship period

APPLY
If you are interested in an Internship at the College Board and you meet our qualifications, please apply by visiting our Careers page at www.collegeboard.org/careers. Please submit a resume and cover letter.

The College Board is committed to diversity in the workplace and is an Equal Opportunity Employer. The College Board participates in E-Verify, a service of DHS and SSA, where required.
