Jr. Software Developer Opportunities!

Develop your future and grow with us!

HyperGen Inc. is one of Inc. Magazine's 5000 Fastest Growing Privately Held Companies

Leave that suit in the closet!

We are a Casual Work Environment that values your creativity! We develop hard and play hard with rewarding opportunities for growth and expansion.

As a Jr. Software Developer you will have the opportunity to develop skills and work with technologies such as HTML, JavaScript, XML, SOAP, SOA and/or other Web development technologies as well as Object Oriented Programming Language(s) (i.e. Java, C++, DotNet). You will learn ERP technologies in Oracle and PeopleSoft Systems (PeopleCode, PeopleTools, SQR, Crystal) in performance of Installation, Configuration and Administration. Additionally you will learn the latest and greatest technologies in Database Administration on Oracle, DB2 or Microsoft SQL Server platforms.

We are interested in those who have a passion for Information Technology with a Bachelor’s Degree in MIS/IT or Computer Science and are knowledge seekers with can-do attitudes - capable and willing to learn!

Interested in being a part of this dynamic group of ground shakers?
