The employer Music and Arts is accepting applications for a Microsoft .Net Developer.

**Job Description:**
This position will work collaboratively with product designers and other software developers to design and create new software modules, enhancements, and features. They will be responsible for the design, coding, testing and successful implementation of production modules.

**Essential Duties and Responsibilities**
- Interpret written business requirements and technical specifications.
- Create and maintain technical documentation using defined templates.
- Develop appropriate reports and reporting structures.
- Develop software according to written technical specifications.
- Write code established to Microsoft Best Business Practices and CfMD standards.
- Perform testing of programs to established standards.
- Investigate, analyze and document reported defects.
- Perform maintenance programming and correct identified defects.
- Create, document, and implement unit test plans and scripts.
- Manage individual scope of work and maintain weekly reporting for time, expenses, and status. Interpret customer business and functional requirements and create technical specification documents for utilization.

**Qualifications:**
- Knowledge of relational database architecture and design, SQL and MS SQL Server SSRS
- Knowledge of Visual Studio and C# coding languages, MS Sharepoint and AX Enterprise Portal
- Ability to interpret written requirements and technical specification documents
- Ability to code software according to published standards and design guidelines
- Effective communication skills and ability to work with business users for requirements gathering and implementation
- Knowledge of quality framework for development of software and/or implementation of ERP systems

**Education and Experience (Nice to have)**
- 3+ years expertise developing OO-programs
- 2+ Axapta and X++, preferably with Dynamics AX 2012 experience
- Bachelor's degree in Computer Science, MIS or related field
