Pathways Announcement Structure

Each of the six announcements have specific educational requirements:

Technical positions:
1. Aerospace Engineering: candidates must be pursuing an AST-qualifying Aerospace or Aeronautical Engineering degree to be eligible
2. Mechanical Engineering: candidates must be pursuing an AST-qualifying Mechanical Engineering degree to be eligible
3. Electrical Engineering/Computer Engineering/Software Engineering/Computer Science: candidates must be pursuing an AST-qualifying Electrical Engineering, Computer Engineering, Software Engineering, or Computer Science degree to be eligible
4. Graduate-level Engineering: candidates must be pursuing a graduate level AST-qualifying degree to be eligible

Non-technical positions:
5. Accounting: candidates must be pursuing a degree in Accounting, Business Administration, Finance, or Public Administration to be eligible
6. General Business: Preferred majors include Management, Supply Chain, Economics, Communication, Marketing, Journalism, Human Resources, and Industrial Hygiene

Closing Date

Each job announcement will close on Friday, 9/22/17 OR after a particular number of applications are received, whichever occurs first. The language in each announcement will identify the cut-off number of applications that will trigger the closing of the announcement.

If the announcement closes on the date that the cut-off number of applications are received, all applications submitted by 11pm Central time that day will be given consideration, including those in excess of the cut-off number.
As you reach out to your networks, please encourage candidates to apply as soon as the announcements open on 9/18/17 due to cut-off numbers.

**Selection Timeline**

We anticipate conducting interviews from 10/27/17 to 11/17/17 with final selections completed by Thanksgiving. Students selected from these announcements may begin work in January or August 2018.

The template below may serve as a guide to assist you in conducting outreach. Please share this with your employees and networks as you see fit. We’ve also included a brochure that assists applicants in navigating the USAJobs.gov application process (see attached). There will be a follow-up email prior to the announcements that will include links to each announcement.

For more details about our program, you may direct candidates to our online presence at:
