Firm Description:

Rock Creek is a leading global investment firm that applies cutting-edge technology and innovation to investments. We strive to invest at the forefront of change through private market investments at the seed, venture and growth stages, direct investments in start-ups and private companies, and through close collaboration with other fintech firms.

Position: Summer Analyst (Data Science)

Rock Creek is looking for graduate and undergraduate students who will:

- Work directly with the Rock Creek Investment, Risk and Technology Teams on current tech R&D initiatives; apply cutting-edge analytical techniques to the field of investment management
- Receive personalized mentorship from senior partners and analysts of Rock Creek

Desired Skills/Experiences:

- Academic pursuit or completion of degree in Computer Science, Mathematics or a related major
- A demonstrated passion for and advanced understanding of data science, big data analytics and/or artificial intelligence (AI); prior experience with programming and coding in a finance-related application
- A strong academic record with a well-rounded set of extra-curricular and/or athletic experiences
- A familiarity with investing, financial markets, global economics and geopolitics
