SynaptiCAD

Multiple Software Development Positions

SynaptiCAD is hiring programmers who are proficient with JavaScript (for web development), Python, or C++. Experience with Unix is a bonus. Summer positions are available now and part-time positions will be available this Fall.

The work will likely consist of developing applications for government SBIR contracts in the Blockchain or System of Systems areas.

SynaptiCAD is a small business specializing in electronic design automation (EDA) software, blockchain applications, and engineering services. We are located here in Blacksburg.
