We believe when you find the center of talent, passion, and skill you have hit the “MARK” that causes you to thrive. We believe in empowering our employees with the resources they need to succeed so we can all celebrate the rewards and benefits of high performance. If you are looking to grow as a professional, then don’t hesitate to contact Venveo.

Please submit resumes to careers@venveo.com

Software Developer
Description:
1. Enter existing codebase and extending functionality for scoped features while maintaining an efficient and quality-driven timeline.
2. Clear communication with team to drive scope initiatives and ensure timely delivery.
3. Implement context-switching to other technologies, platforms, and server stacks.
4. Assist in site maintenance and development
5. Quickly learn, understand and implement new and/or old technologies to best leverage for particular projects
6. Effectively deploy code to production environments to ensure high quality service
7. Leverage your technical knowledge and creativity to find business opportunities within the company
8. You will contribute to open source repositories on the company github (github.com/venveo)

Skills and Requirements:
• Proficient in PHP and familiar with other server side web technologies
• Proficient in basic frontend technologies (HTML, Javascript, CSS, etc)
• Proficient in SQL driven databases and effective data-structuring
• Knowledge of unit testing, dependency management, and clean code
• Proficient in Git usage
• Knowledge of frontend frameworks (i.e. Foundation, Bootstrap)
• Knowledge of frontend build processes and dependency management (i.e. Gulp, npm, webpack, etc)
• The ideal candidate will demonstrate an ability to: multitask in a fast-paced environment, work well with people from a variety of different backgrounds and cultures, build relationships with clients and co-workers, work independently and as part of a team, take active and sometimes creative measures to solve problems and commit to a high level of service.

Preferred Experience:
• Familiarity with advanced Javascript concepts (Babel, Gulp tasks, ECMA6, etc.)
• Experience with PHP frameworks and libraries (Laravel, CodeIgniter, Yii, etc.)
• Server infrastructure experience (deployments, Apache, nginx)
• Docker!

All qualified applicants will receive consideration for employment without regard to race, color, religion, sex, age, national origin, protected veteran status, disability status, sexual orientation, gender identity or expression, marital status, genetic information, or any other characteristic protected by law.
