

Prototype Development Facility

We are located in Bethesda, MD, close to the D.C. Beltway. We have a diverse team of 80 software developers and system engineers (including 18 Hokies) and are looking for new undergrads to join our team. We design, develop and deliver a variety of tactical and training systems for submarines and ships, including complex display design and high-fidelity acoustical and visual simulation utilizing state-of-the-art LINUX clusters. Our team includes top experts in the industry from both the public & private sector.

If you are a CS or CPE major, are highly motivated, want to learn new skills and gain valuable *real-world experience*, then you are a perfect fit.

Skill Areas:

- JavaScript, Java servlets, C, C++
- Network/System Administration
- Graphic Display Design
- State-of-the-art LINUX Clusters
- Acoustic & Visual Simulation

Student Benefits:

- Paid Holidays
- Paid Vacation & Sick Leave
- Travel
- Performance Bonuses
- Tuition Assistance

How Does Our Undergrad Program Work?

We employ summer students as well as co-op students who alternate semesters of work with semesters at school. Our program is challenging, but the payoff is huge! When you graduate, you will have *real* work experience, a great resume, contacts in the industry, and marketable skills that will set you apart from your peers.
