

**Company:** NanoSafe, Inc.

**Position location:** Blacksburg, VA

**Position:** Interface Designer (part-time)

**Responsibilities:** Individual will rapidly concept, implement and refine prototype for interactive application.

**Description:** NanoSafe, Inc. is seeking a talented software developer to assist in creating graphical user interface designs and prototypes for several webservices-based applications. The developer should be knowledgeable in common interface layer languages and specialize in MacOS development environment. The project is a rapid build of multiple interfaces of different mobile and web clients with a common set of back-end webservices. The ideal candidate will formulate graphical user interface concepts for each platform and rapidly prototype several versions of the interface with rudimentary functionality with the webservices. A talented eye toward clean, simple, and functional interface designs is a must. General knowledge of the MacOS development environment, and XML scripting to pull relevant data will be required. Language Builds include: Objective-C, Cocoa, XML scripting for webservices. Environments include: Python, xCode/Interface Builder. **NOTE: DUE TO GOVERNMENT CONTRACTING REGULATIONS, U.S. CITIZENSHIP IS REQUIRED.**
