

Please feel free to pass this information along to students. Also please let students know they can email me directly with questions, or just to let me know they've applied so I can pass that information along to the recruiter

This opportunity is available in both Charlotte, NC and in Valley Forge, PA.

**Students can apply at www.vanguard.com/careers
Just search for "Internship".**

*Be sure to select the "IT College to Corporate" internship as our business internship has a very similar name.

IT College to Corporate Internship Program

Position Details

Vanguard, one of the world's largest investment management companies and a recognized employer of choice, seeks career-oriented individuals with a passion for learning for our IT College to Corporate Internship Program. The program is available to students in IT-related majors who are completing their junior year of college, are looking for a challenging summer internship experience, and want the opportunity to build their skills using the latest technology, including:

- Databases: DB2, Oracle, SQL Server.
- Platforms/Servers: zOS, Solaris, Windows, Linux, Web and Application.NET, Spring, Web Services.
- Languages/Tools: Java, JSF, Ajax, JavaScript, C/C++/C#, XML, XSLT, HTML, XHTML, CSS, Cobol, Maven, Hudson, Subversion, Nexus, JTest.
- Concepts: Distributed, Tiered, Data Driven. Service Oriented Architecture.

About the program

The program is a full-time, paid summer internship at our Valley Forge, Pennsylvania, or Charlotte, North Carolina, locations. We provide extensive training, real-world experience and hands-on opportunities in one or more of the many technical areas within Vanguard. You'll work with professionals committed to broadening your technical expertise in various areas of IT, such as:

Application Development (Available in Pennsylvania and North Carolina)¿Positions will focus on the software life cycle; you¿ll work on programs with direct application to our clients in:

- User interface (UI) design
- Mid-tier or host development
- Requirements analysis
- Application testing and/or application support

Technology Operations (Available only in Pennsylvania). These positions are ideal if you want one to focus on data-center operations:

- Supporting Unix or Windows platforms
- Capacity planning
- Performance analysis and network operations
- Supporting video and voice technologies

Program support

To help ensure your success, you'll participate in a structured development program that will help you and your fellow interns build a range of important skills. You'll be given several opportunities to learn from experts, gain exceptional hands-on experience, and network with peers and management. At the end of the summer, you and your group will have developed strong, lasting relationships with each other and Vanguard.

Future opportunities

Upon successful completion of your internship, we will consider you for employment in our Technology Leadership Program (TLP). Typically 50% of TLP positions are filled from our internship program. You¿ll find details about the Technology Leadership Program at vanguard.com/careers.

Qualifications

Only U.S. citizens, lawful permanent residents, or others with the permanent right to work in the United States will be considered for this position. Employment is also contingent on a successful drug-screening result.

The ideal candidate is currently a junior who possesses:

- Working toward a bachelor's or master's degree with a concentration in Computer Science, Computer Engineering or a related technical/engineering discipline. Mathematics, MIS, Graphic Design majors are also encouraged to apply.
- Cumulative GPA of 3.0 or higher preferred.
- Demonstrated leadership skills.
- Effective analytical, communication, interpersonal and problem-solving skills.
- Ability to work independently and as part of a team in a dynamic environment.
