

Software Developer in Test

The Webapps team is seeking a **Software Developer in Test** in our Blacksburg, VA office. As a software developer in test for Rackspace, you will work on a high-energy team, performing functional, application, and performance tests using the best engineering practices in the industry today (e.g., unit testing, source control, continuous integration, automation, design patterns). Passion for all aspects of software development is a must.

More about the Rackspace Cloud business unit:

Do you want to be part of creating the next generation of computing? Rackspace Cloud is the leading innovator in cloud computing, and we are defined by Fanatical Support—not just for our clients, but for our team. Rackers have the freedom to do great work, and the challenge of using their skill and ambition to drive the future of the Web. Rackspace Cloud provides on-demand scalable website, application, and storage hosting. We enable developers and business decision-makers to avoid the hassles and costs of dedicated hardware while offering the infinite scalability of the Cloud.

Responsibilities:

- Perform highly structured and automated testing tasks on alpha and beta product versions
- Perform functional, application, regression, and performance tests
- Verify data and investigate product integrity and software functionality and keep records of test progress and results
- Schedule testing resources
- Perform black box testing
- Write bug reports, test plans, and specification reviews
- Facilitate team growth and effectiveness

The ideal candidate will have the following:

- Bachelor's degree in Computer Science, Computer Engineering, or related field
- Experience in product research and testing
- Experience with networking and testing in the areas of data acquisition, storage, and retrieval; using Black Box and White Box testing
- Knowledge of Agile Methodology and other software development

methodologies

- Excellent communication, organization, and interpersonal skills

Rackspace, a world leader in hosting delivers enterprise-level managed hosting, cloud hosting, and e-mail hosting services to businesses of all types and sizes globally. Today we serve thousands of customers from data centers around the world. Rackspace integrates the industry's best technologies and practices for each customer's specific needs delivering it as a service via the company's commitment to Fanatical Support®. We serve as an extension of our customers' IT departments enabling them to focus on their core business. Rackspace was founded in 1998 and since then has had significant growth year after year. There are now over 3,000 Rackers employed worldwide dedicated to providing customers our premier hosting services.
