

Software Test Engineer

Rackspace is seeking a **Software Test Engineer** to be responsible for designing and implementing testing processes and Software Quality Assurance (SQA) methodologies necessary to deliver scalable, maintainable, and defect-free systems in an on-time and cost-effective manner.

More about the Rackspace Cloud business unit:

Do you want to be part of creating the next generation of computing? Rackspace Cloud is the leading innovator in cloud computing, and we are defined by Fanatical Support—not just for our clients, but for our team. Rackers have the freedom to do great work, and the challenge of using their skill and ambition to drive the future of the Web. Rackspace Cloud provides on-demand scalable website, application, and storage hosting. We enable developers and business decision-makers to avoid the hassles and costs of dedicated hardware while offering the infinite scalability of the Cloud.

Responsibilities:

- Design and implement testing processes and Software Quality Assurance (SQA) methodologies
- Deliver scalable, maintainable, and defect-free systems in an on-time and cost-effective manner
- Perform functional, application, regression, and performance tests, and execute manual, pre-determined testing procedures and programs
- Schedule resources and black box testing, write bug reports and test plans, review specifications, and facilitate team growth and effectiveness.

The ideal candidate will have the following:

- High school diploma or equivalent
- Up to 18 months of experience in product research or testing
- Basic testing skills
- Ability to accurately estimate task durations and meet schedules
- Experience with PCs and various software applications
- Familiarity working with Agile processes (Scrum, XP, Lean, Kanban, etc.)

- Familiarity with manual testing techniques and processes, including cross-browser testing
- Familiarity with QA tools and techniques, bug tracking systems, test design, and test execution
- The ability to coordinate testing efforts within a development team from the unit level to the system level.

Rackspace, a world leader in hosting delivers enterprise-level managed hosting, cloud hosting, and e-mail hosting services to businesses of all types and sizes globally. Today we serve thousands of customers from data centers around the world. Rackspace integrates the industry's best technologies and practices for each customer's specific needs delivering it as a service via the company's commitment to Fanatical Support®. We serve as an extension of our customers' IT departments enabling them to focus on their core business. Rackspace was founded in 1998 and since then has had significant growth year after year. There are now over 3,000 Rackers employed worldwide dedicated to providing customers our premier hosting services.

Rackspace Hosting is an Equal Opportunity Employer
