

Software Engineer

Product Engineering Group
Blacksburg, Virginia

Luna Innovations, a NASDAQ-listed public company, develops and manufactures new-generation products for the healthcare, telecommunications, energy and defense markets. Our products are used to measure, monitor and improve critical processes in the markets we serve. Through its disciplined commercialization business model, Luna has become a recognized leader in transitioning science to solutions. Luna is headquartered in Roanoke, Virginia.

Luna's Product Engineering Group is searching for a motivated, organized, quick-learning Software Engineer. Candidate must have the ability to work well in a team environment. Responsibilities for this software engineer position consist of designing, developing, documenting, testing software modules for use in test instrumentation. Knowledge of C/C++ programming languages required and familiarity with the LabVIEW programming environment is desired. Knowledge of Linux and development of embedded systems software/operating systems is desired. Candidate must have the ability to learn quickly and work well in a team environment. Candidate must also possess strong problem solving skills, and have effective verbal and written communication skills.

Required:

- Candidate must be pursuing a degree in electrical engineering, computer engineering, computer science or related field.
- Strong problem solving skills and effective verbal and written communication skills

Due to government contracting regulations, U.S. Citizenship is a firm requirement.

Luna Innovations, Corporate Headquarters, 1 Riverside Circle, Suite 400, Roanoke, VA.
No phone calls please.

Interested candidates can submit their resumes to Mr. Kevin Marsden
at: marsdenk@lunainnovations.com.
