

## Comdata

For four decades, Comdata has been at the forefront of payment innovations. We invented the concept of electronic payments for transportation, and in the process launched the Comdata Card — a payment solution that helped drive an industry. Comdata solutions now touch financial transactions of all kinds. Our integrated financial solutions are changing the way companies manage data, pay their employees, process merchant transactions, and manage spending on key business purchases from travel to fuel. Every day, the Comdata network enables millions of transactions for drivers, shoppers, and employees through secure, robust and scalable networks. Listening closely to our customers, we develop custom solutions that help drive their success.

Comdata is currently in need of IT professionals to support our growing business. Any students interested in a fast-paced, ever-changing setting with intern experience in Java development, or other design, architecture, support and recovery of systems environments are encouraged to send a resume to [abelville@comdata.com](mailto:abelville@comdata.com). Based in Brentwood, Tennessee, Comdata is located in northern Williamson County immediately south of Nashville. Brentwood includes approximately 35.4 square miles and is considered to be one of the most desirable suburban locations in Tennessee because of the high standard of living, the recreational amenities and the quality of the public schools. For more information, please refer to our website at [www.comdata.com](http://www.comdata.com).
