

Job: Entry Level C++ Development Position in Beaverton, OR

[IP Fabrics](#) is a company that produces Deep Packet Inspection technologies.

We are primarily interested in seniors that are in the Networking track, but will consider any senior as long as they have relevant courses or experience.

Required skills:

C++

Writing networking software at the protocol level

Comfortable developing on Linux

Understanding of multi-core, multi-thread techniques

Understanding of TCP/IP, UDP, and IPv4/6

Optional:

Java

Web development skills

For a full job listing please go to: http://www.ipfabrics.com/careers/software_engineer.php

Submit your resume at: jobs@ipfabrics.com

Tip: if we decide to contact you we will ask for code samples, so please have code samples in C++ that you are proud of readily available.
