**Technical Requirements**

**Responsibility:**

Impact Innovations Systems, Inc. is an e-Business software development firm and a market recognized EMC systems integrator. We are located at Manassas, Virginia and are currently looking for multiple junior developers to fill entry level positions. Candidates will be developing software applications using various development tools including, JAVA, Microsoft C#.NET, XML, XSLT, and SQL. This position offers a great opportunity to be exposed and learn to develop various software development tools as well as systems integration. Strong knowledge in object oriented programming concept and methodical programming skills are essential.

**Job Requirements:**

- New Computer Science (C.S.) or MIS related graduates with GPA of 3.2 or higher ONLY
- 0-2 Years experience in a full-time position as a software developer.
- Strong knowledge of Object Oriented development, Java/C#/C++.
- Web application development knowledge is a big plus.
- Knowledge of SQL, ability to write queries.
- This is an excellent position with an opportunity for growth.
- Willing to relocate to Northern Virginia (Near DC).
