

.Net Developer

For the current requisition, we are looking for a .Net developer to join an extremely experienced development team developing a .Net/Silverlight based product focused on Medical Analysis, Research and Reporting.

This is an opportunity to get in early with a start-up with great potential, learn from some very experienced developers and work with some leading edge technology and techniques.

Requirements:

- 3-5 years experience developing .Net web-based solutions
- Bachelor's of Science Computer Science or Information Technology or 4-5 Relevant Work Experience
- Understanding of the entire software development process, including design, programming and documentation.

Responsibilities:

- Creation of automated test cases using testing tools such as NUnit and StatLight
- Ability to gather requirements, define an approach and design and implement the solution
- This is an opportunity to get in early with a start-up with great potential, learn from some very experienced developers and work with some leading edge technology and techniques
- Gather requirements, design, and develop software
- Designs and executes moderately complex tests cases and reports results for business rules, reports and system interfaces
- Perform complex functional, application, regression, performance tests
- .Net developer – preferably C# and/or Silverlight
- Experience with MS SQL Server, Oracle, Scrum
- We also use nHibernate, Visual Studio 2010, Team Foundation Server but these are less important

If you are interested in this position, please contact Ms. Rios-Bond directly.
