

**LAUREATE**  
EDUCATION INC®

### **Jr. Applications Developer**

Laureate Education Inc. is currently looking to add a qualified and motivated individual as a Junior Applications Developer to our staff. The Junior Applications Developer will be expected to quickly master our software development life cycle and support the senior development staff with software version control management, software release to testing and production environments, writing test cases and other documentation, and light coding and script development to automate various SDLC processes. Applicant will fill an integral role within the development team.

#### **ESSENTIAL DUTIES AND RESPONSIBILITIES:**

- Must be able to work with senior staff in producing application documentation, developing release scripts and writing test cases.
- Working closely with a development team and project manager to code, test, and release software.
- Version control software experience is a plus.
- Java, Oracle, .Net knowledge is plus.
- Basic development skills are required.
- Code, debug, test, and document moderately complex application systems.
- Design, implement, and document procedures.
- Works with delivery team clients, managers and team members in identifying integration approaches and addressing data concerns as required.
- Stays current on targeted platform functionality and enhancements.

#### **EDUCATION and/or EXPERIENCE:**

- Bachelor's degree (BA or BS) in Computer science.
- Be proficient in one or more computer languages
- SQL knowledge preferred
- Strong interpersonal skills, including effective oral and written communications.
- Need a strong knowledge of SDLC process.
- Ability to adapt well to change and respond to a fast-paced environment
