Talent Demand: If you say yes to the following, then that's a good sign....

- Are you able of turning ideas into solid User Experience deliverables?
- Do you love to focus on “innovation” and continuous improvement, while engaging in a team-oriented, collaborative environment?
- Do you find it easy to communicate ideas and concepts clearly and concisely?
- Are you naturally flexible and able to shift priorities within an innovative and driven culture?
- Do you welcome failure as a step towards achieving success?
- Do you have strong experience and advanced skills in e-commerce user experience design, from processes to research methods?
- Do you have experience in defining, developing and documenting User Experience design and interaction requirements/specifications?
- Do you have familiarity with HTML/DHTML, CSS, javascript, and other web technologies and their strengths/limitations as they relate to User Experience development?
- Do you have experience with high fidelity interactive prototypes and with developing interactive pattern libraries as part of the user experience?

Hats-to-Wear:

-Part of a small team of User Experience Designers, Usability Researchers, Information Architects and Analysts. You will be involved in all phases of the development process, including the following: running brainstorming sessions to elicit business requirements, gathering user research data, creating wireframes, producing finished screens, writing User Experience specifications and building prototypes.
