

The Collegiate Times

The Collegiate Times is looking for web developers to join our staff. We have several paid positions open for developers looking to maintain a news website and develop interactive features that will be viewed by more than 35,000 people a week.

The CT releases a print edition four times per week and maintains a constant web presence. We are expanding our usage of interactive storytelling methods using data, slideshows and multimedia presentations. Developers would work collaboratively with editors to make web-only content. They would also help maintain the custom-built site and CMS.

It is a great opportunity to gain real world experience and use your skills in a fast-paced, collaborative environment. We have one of the best college news websites in the country and can really help you showcase your skills on a regular basis.

Working for the CT is what you make of it. You can take on a variety of workloads, but should plan to complete at least one interactive feature per week. If you would like to take on more responsibility, we will also be looking to fill our online director position. The online director assumes responsibility for the maintenance of our site and for managing all the paper's developers.

To apply or find out more about becoming a developer or the online director, email me at editor@collegiatetimes.com with your name, year and links to examples of some of your past work.

Thanks, and I look forward to hearing from you.
