

Help Wanted

Information Technology Support

This part-time employee will have skills with PHP and Drupal and will provide web server and web-based company intranet development and maintenance support services on a scheduled basis.

This work involves knowledge of web site development tools, specifically Drupal and programming in PHP, as well as some knowledge of Open Atrium. Work will also include assistance in laying out processes for normal office functions (e.g. credit card processing) and adapting these processes to the Maestro open source program.

Work hours and location are flexible; 20 hours per week are anticipated; Work may begin immediately

The employee will also be proactive in keeping abreast of new technology, software, and services that enhance the Company's beneficial use of Information Technology

Company and Contact Info.
