PIEtech Inc., located in the Richmond, VA area, is a leader in the development and delivery of online financial planning software. Our internet-based software, MoneyGuidePro, is used by over 35,000 financial service professionals including major financial institutions and many prominent financial planners. For the past 4 years, our software has been recognized in Financial Planning Magazine as the #1 software of choice among financial advisors!

With the continued success of MoneyGuidePro, we need additional .NET software developers to join our team. You’ll gain experience in all aspects of internet software development from design and coding to testing and implementation on our production sites. This is a great opportunity for persons with excellent programming skills who want to contribute to all aspects of developing a product.

As a small, privately-owned company, we have created a work environment that is hard to find in today’s business world, including:

- A high degree of individual independence and responsibility
- Little management hierarchy, no office politics, and pay based on value-added, not seniority or management role
- A new, company-owned office building in a beautiful woodland setting
- Excellent salary, bonuses and benefits
- A FUN work environment.

The tenure of our staff is a testament to what a great place PIEtech is to work. The average tenure for our development team is over 10 1/2 years. In addition to all the benefits you would expect from a large corporation, we also offer some very unique perks:

- A private office (with window!). No cubicles.
- Free snacks
- Casual dress day every day
- Twice monthly massages
- Personal trainer available in our in-house gym
- Tennis court on site
- Pet friendly environment
- And much more!

Visit us at MoneyGuidePro.com to learn more about us, and see our Software Development job posting on Hokies4Hire. Resumes can be emailed to Laura Leal at PIEtech, Inc. lleal@pietech.com.

P.S. In case you were wondering, the acronym PIE stands for Plan-Invest-Enjoy. We believe that the main purpose of financial planning is to assist clients with their financial needs in a way that frees them from worry, and allows them to go enjoy their lives. Hence, “Plan” better, “Invest” smarter, then “Enjoy” life more.
