Alere Informatics (AI)
Charlottesville, VA

Business Analyst

Alere Informatics (AI) is the industry leader for point of care data management, providing innovative web solutions for over half of all hospitals in the United States. Its parent company, Alere delivers immediate and actionable information through rapid diagnostic tests and data management systems.

AI is looking for an individual that can lead an Agile development team both through requirements clarity, as a Business Analyst, and process guidance, as a ScrumMaster.

As a Business Analyst at Alere Informatics, you will:
- Define and document software requirements
- Promote and participate in the continuous improvement of processes and tooling
- Gather product feedback from internal and external customers
- Author documentation to be consumed by internal and external customers

As a ScrumMaster at Alere Informatics, you will:
- Guide and coach cross-functional teams to excellence
- Facilitate team meetings and scrum ceremonies
- Protect the team from distractions and interruptions
- Identify and assist in resolution of team conflicts, including competing priorities

Preferred education and experience:
- Bachelor’s degree or three or more equivalent years of related experience
- Technical writing aptitude
- Strong communication, both written and verbal
- Strong attention to detail
- Able to think strategically and independently
- Works well under pressure

Benefits
- Competitive salary based on experience
- Comprehensive benefits including medical, dental, 401K match, PTO, Employer paid life insurance
- Continuing education opportunities with tuition reimbursement
- Fun work environment with regular employee-centered events
