Alere Informatics (AI)
Charlottesville, VA
Software Developers (with a passion for software development, responsive web design, and learning new web technologies)

Top Reasons to Work with Us:

We are a technology-driven company with an emphasis on providing connectivity and data management in the healthcare IT world. You'll have the opportunity to work in a fun, fast-paced, team environment while developing a brand new UI for our RALS web application using the latest in web technologies.

Compensation:

- Competitive salaries based on skills and experience
- Comprehensive benefits including medical, dental, vision, and other benefits
- 401(k) Savings and generous Stock Purchase plans
- Flexible time off policy that shows our commitment to work/life balance
- Continued Education Opportunities with tuition reimbursement.

What You Will Be Doing:

- Designing and implementing high-performance code for new UI components in an Agile development environment
- Finding ways to innovate and improve usability; providing additional benefits to customers while reducing complexity.
- Staying up-to-date on the latest technologies in web development.
- Helping to define User Stories and the visual design of a new UI
- Investigating and troubleshooting data and user related system errors.
- Participating in code reviews, automated test creation, and manual testing when needed.
- Perform other related duties as assigned.

What You Need for this Position:

- Knowledge and experience working with object oriented programming languages
- Experience with client-side web technologies
- Knowledge of database design and SQL syntax
- A good understanding of software design patterns
- Strong debugging and troubleshooting skills
- Exceptional communication and collaboration skills
