WE ARE HIRING!

Searching for 2017-2018 Graduates

Interested in receiving a TS/SCI Clearance!

Job Location: Annapolis Junction, MD

As the Intelligence Community’s premier Information Technology (IT) managed services provider, CSRA combines best-in-class commercial practices with outstanding customer service. With CSRA providing world-class, innovative technology solutions, its customers have been able to respond more effectively to a rapidly changing mission, improve information assurance, and better focus their human resources on core missions.

CSRA is seeking to add a variety of skill sets to our early talent roles. If you are interested in joining an exciting company with a mission critical to our National Security efforts and have exposure, experience or are studying towards a degree with the following skills areas, please apply!

- ServiceNow Application development
- Scripting Languages (JavaScript, CSS, Unix Shells)
- API Development (REST, SOAP, SOA, JSON)
- User Interface (UI) / User Experience (UX) development
- Application, Systems and Network Administration

Job Summary:
A student worker capacity under direct supervision, assists in analyzing and evaluating existing or proposed systems and devices to process data. Assists with developing programs and system components from specifications.

Essential Job Functions:
Assists the project team with gathering requirements from a technical perspective and developing documentation of system specifications. Codes, tests, and debugs computer programs from specifications. Assists in designing and implementing new methods, procedures, and systems (both automated and manual) to improve the processing and flow of information within the company. Gathers information from users for analysis of technical problem areas and prepares elementary feasibility studies.
