Looking for Web Developers

The Discovery Analytics Center (DAC) is looking to hire students with exceptional programming skills and experience with Web Development. The selected candidates will work on building a web interface for a financial accounts database.

**Job Description**
The selected candidates will develop a web interface for managing a financial accounts database. Using the interface, a user should be able to query the database, visualize results and make modifications.

**Requirements**
- Exceptional programming and web development skills
- Proficiency with at least one of the widely used web frameworks like django, ruby on rails, node, asp .net, etc.
- Proficiency with either Javascript or C
- Experience with web technologies (HTML, CSS, Javascript, Angular, Bootstrap, etc)
- Experience with version control systems, preferably git / Github

**Pay, Hours and Location Information**
- $15/hr (10-15 hrs per week for the Spring 2017 semester)
- Office space available / work from home or online.
- Some face-to-face meetings

**Application Procedure**
Please email your application by January 27th to parang@cs.vt.edu with the following subject line: Application for web development. Positions will be filled on an ongoing basis, so apply as soon as you can.

In your application, please include the following:
- Detailed resume
- State all projects that demonstrate your prior programming skills
- List your Proficiency level with web technologies
- A brief note (300 words max) on why you are interested in this project

Position open to Virginia Tech students and affiliates. For any questions, please send an email to parang@cs.vt.edu or visit us at http://dac.cs.vt.edu
