EPA Environmental Research and Business Support Program
Athens, GA

New initiative at the Environmental Protection Agency, EPA Environmental Research and Business Support Program. My organization, ORAU, places recent graduates (within two years) at EPA’s Office of Research and Development sites nationwide. We currently need the following!

EPA Android Mobile Applications Developer

The Office of Research and Development at the EPA facility in Athens, Georgia, is looking for an Android Mobile Applications Developer. The Developer will assist the EPA Cyanobacteria Assessment Network project by enhancing and maintaining an existing Android mobile software application that disseminates satellite data of harmful algal blooms. Job is expected to begin May/June 2016.

- Full time, $19.74/hour
- Must have a bachelor’s degree in computer science, information science, statistics, math, physics, chemistry, computational biology, biology, toxicology, informatics, or a related scientific/computational field
- Must have education/experience in software development of mobile and web based applications, demonstrated knowledge of Android mobile application development software tools, and strong written, oral and electronic communication skills
- Will perform tasks such as writing Java code, preparing distribution packages, compiling and packaging code, maintaining websites, servers, and code for various applications, and deploying Android mobile apps using software methodology
- For the full position description and to apply, visit our website: http://www.orau.org/epa/apply/description.aspx?JobId=19540

If you are interested, please let me know and I can talk with you about the project and the upcoming interview schedule.
