SynaptiCAD

Multiple Software Development Positions

SynaptiCAD is hiring programmers who are proficient with JavaScript (for web development) or Python. Experience with C++ and Unix is a bonus. Part or full time positions are available for Fall 2017 and beyond.

The work will likely consist of developing applications for government SBIR contracts in the System of Systems or Blockchain areas.

SynaptiCAD is a small business specializing in electronic design automation (EDA) software, blockchain applications, and engineering services. We are located here in Blacksburg.
