Virginia Cyber Range  
Virginia Tech, Blacksburg  
Front-End Web Developer

Looking for a creative and passionate Front-End Web Developer with hands-on experience in building component-based Web UI with modern Javascript frameworks such as React, AngularJS, Vue, Polymer, etc. This position develops, maintains and supports front-end facing software for the Virginia Cyber Range. Projects will involve development and elaboration of a web UI for a cloud-based deployment, using a microservices backend.

If interested, include a resume that highlights javascript and web front-end experience and email raymondd@vt.edu.

David Raymond, Ph.D.
