Junior Software Engineer
Tensley Consulting is an employee centric company that is dedicated to mission excellence. We are looking for all levels of students that want to be a part of an incredible team that perform cutting edge development! Tensley is seeking talented engineering students that are in search of full-time positions, internships or for those who wish to obtain a security clearance for future employment. For all above opportunities students should meet most of the criteria listed below:

**Required**
- Familiarity with design, development, and improvements to system software and applications.
- Computer/system software design and development for LINUX and/or Windows platforms
- Designing, coding, testing and debugging software written in Java, C++ or C
- Academic or practical experience with scripting languages such as PERL, PYTHON, BASH, etc.
- Academic or practical experience with Object Oriented Programming and understanding of Software Engineering Methodologies such as Agile.
- **Must already possess a security clearance or be a US citizen and able to obtain a security clearance**

**Desired**
- Working knowledge and/or experience with software tools such as JUnit, JBuilder, and ECLIPSE preferred but not required.
- Experience with Field Programmable Gate Array (FPGA) logic design and/or Hardware Description Languages desirable.
