On-Road Experimenter
Immediate Openings

Requirements:
Must be available to work at least 4 nights per week
Must possess a valid driver’s license
Must be able to lift 50 lbs. unassisted
Must be willing to work outside at night
Must be punctual and dependable

Details:
Shifts typically run from dusk- (currently about 8:30 PM) to midnight or later (although we do have a few that run during the day as well)
Most studies run Sunday-Thursday, but if our needs are high we will run 7 nights per week.
Pay is $10.00/hour
Typically a good second job as the work can be influx

Description:
On-road experimenters are tasked with setting up the Smart Road for a participant study, presenting experimental conditions during the study, and cleaning up the Smart Road once the study is done. During our night studies, it is typical for an on-road experimenter to stand on the side of the road as a pedestrian, set up objects along the road such as deer decoys or wooden targets, or in some cases operate experimental equipment.

Please send an email of interest along with your resume to Liz Catron at lcatron@vtti.vt.edu to be considered.

Virginia Tech is an equal opportunity/affirmative action institute.
