Software Development Internship

Students interested in software development can gain real-world experience at Ellucian while working with the latest software development technologies and methodologies. At Ellucian, interns are first trained in the fundamentals needed to be active contributors on our team. Once this training is completed, each intern is assigned to a work team with a mentor. They start right away working on projects that impact Ellucian’s clients.

Interns work closely with their mentors throughout the summer while programming software. Mentors are also available to help interns navigate Ellucian’s unique corporate culture that embraces interns and treats them like regular employees.

Requirements:

- Computer Science or MIS majors
- Successfully completed several programming classes
- Prior hands-on internship experience in a corporate environment is a plus.
- Junior status
- Submit a cover letter and resume. Your graduation date should be clearly stated.

**IT-Business Intelligence Internship**

As an IT-Business Intelligence intern at Ellucian, you will be a part of the team that helps the organization by providing accurate and timely reporting and data from a variety of Enterprise Systems. You will work directly with internal business users to understand business needs and issues, and also the core IT Data Warehouse and BI team in providing the best possible solutions that move the business forward. You will have an opportunity to work with a number of industry standard on-premise and cloud tools to build data sets, engaging visualizations and dashboards for business analysis.

**Responsibilities**

- Assist in the definition, development, and documentation of reports business requirements, objectives, and deliverables.
- Developing wireframes to demonstrate report design concepts.
- Design and development of Dashboards using Tableau for various organizational metrics.
- Develop data mapping, designs, and implement extract/transform/load processes using SSIS or Informatica Powercenter.
- Coordinate with internal resources to build collaborative working relationships with business partners to support end users on ad hoc data and report requirements.

**Requirements**

- Junior or senior undergraduate students pursuing an IT or MIS related track.
- Ability to work full time and on-site at Fairfax, VA.
- Strong foundation in database systems.
- Strong analytical skills and comfortable working with large data sets and ability to create data into actionable insights.
- IT savvy - adaptable and flexible to enjoy working on solving challenging business problems.
- Healthy dose of initiative and curiosity - a mindset to contribute beyond the basic responsibilities and constantly look for better ways to do things.

Professional Services - Integration Internship

As a Professional Services Integration Engineer Intern at Ellucian, you will assist and gain experience working closely with Professional Services teams by helping with some of the following projects:

- Prepare, develop and present integration specifications
- Develop application integrations utilizing Java, Groovy/Grails, Web Services, Cloud and Enterprise Service Bus architectures
- Assist in the adoption of event driven architecture for Identity Provisioning
- Develop integration prototypes for Ellucian Mobile (native Android / Apple)
- Support the development of single sign-on services based on SAML 2 and federation
- Learn about the Ellucian products that power many of the US and global educational institutions
- Work closely with many different resources at Ellucian including professional services consultants, product management, software development, and consulting services leadership.
- At Ellucian, you also may have the opportunity to working with our field sales teams who are geographically dispersed across the globe.

Requirements:

- Junior or senior undergraduate students who are majoring in Computer Science, or have a strong affinity for programming and application design/development.
- Fluent in Java, Groovy/Grails programming, or fluent in Android / Objective C
- Understanding of Enterprise Service Bus (ESB) and messaging architecture a plus (AQMP, JMS)
- The candidate should have excellent verbal and written communication skills, with base knowledge of Word and Excel.
- The student must be able to work full time from May 18 to August 14 in our offices in Fairfax, VA.
- Submit a cover letter and resume. Your graduation date should be clearly stated.
